## PACIFIC BEACH.

Please notify Los Angeles that we have an abundance of water.

Miss Thorpe walked in to Old Town on Sunday, where she took the motor for the city in order to be at her school on Monday.

A force of men is at work on the motor track. Regular trains are now running into the city over the Santa Fe track from Morena.

The sun came out in all its splendor on Tuesday, and several of our ladies improved the opportunity "between showers" to pay their calling debts.

Mrs. Thresher had an opportunity to become better acquainted with her home and neighbors during her enforced vacation than at any time since coming to the Beach to live.

The residents of Pacific Beach are congratulating each other on their fortunate escape from loss during the recent heavy storms. While other places have suffered severely this place seems to have received only benefits, except in the inconvenience of interrupted transportation and the shifting of soil from one ranch to another.
